

Addition to the Risk Assessments – Young people employed at The Plough

The protection of the health and safety of all staff employed at The Plough is important, but even more care is needed when looking after young people (16-18 years old) due to their inexperience. Therefore, the following guidelines are in place:

- As with all staff, no young person will be allowed to undertake work activities without the relevant training having taken place.
- No young person, even when trained, will work on their own or unsupervised.
- No young person will be expected to use dangerous machinery such as meat slicers or waste compactors.
- Young people will be able to work in the restaurant helping to serve food and associated work in preparing the restaurant for customers.
- Young people will be able to work in the kitchen area helping to wash up and undertake simple preparation of food such as peeling vegetables. When peeling vegetables, only purpose designed peelers to be used.
